Review Article On Demonetisation-Boon Or Bane**Dr.Arifuzzaman Khan****Associate Professor****Department of Commerce****Christ Church College****Kanpur****(Received:26November2019/Revised:10December2019/Accepted:16December2019/Published:26December2019)****Abstract**

Demonetisation is a long pending measure to curb black money. Demonetisation was effectively planned by the think-tank but suddenly declared in an unplanned way to curb black money in Indian economy. The surgical strike on black money has derailed the investors' confidence in the stock market in the beginning. The cost of Demonetisation is estimated at Rs. 4.3 trillion including the GDP losses. The Government felt the impact is transient, but the economists viewed it as firing cannonballs to kill mosquitoes. In addition, the government has to employ in time all other pertinent measures in an exigent mode to make the cash ban a grand success. The cash ban caused considerable damage to the wheels of the economy in the form of forced unemployment. The Indian informal sector, which provides 80 percent of total employment was much affected. The reverse migration of work force necessitated them to adopt to a meal per day. Nearly, 2.5 lakh workers in leather industry, 20,000 workers in diamond industry 15% to 20% of daily wagers in Jewel sector have become jobless. The Gross Domestic Product (GDP) estimate was reduced to 7.1% from 7.6% for the year 2016-17 by the Government itself. The International Monetary Fund (IMF) has also lowered the GDP forecast to 6.6% for 2016-17. New Investments fell by 50% in post cash ban. Rupee value also declined by 1.69% on 15.12.16.

Keywords: Demonetisation, Brexit 2016, fake indian currency notes network, AMRUT, RERA, CBDT, USSR, CIS, corporate governance reforms.

Introduction

The Indian Govt. gave an unexpected shock to its citizens on 8th Nov, 2016 by nullifying high value currency. The three big surprises of 2016 viz., Brexit 2016, Donald Trump Win and the India's Demonetization created an uncertainty in the Indian economy¹. The Annual Report of Reserve Bank of India (RBI) 2015- 16 revealed that total bank notes circulated in India were

valued at Rs. 16.42 trillion of which nearly 86% were of Rs. 500 and Rs. 1000 denomination². The Demonetisation of such high value notes grinded the Indian economy to a virtual halt.

CASH IS KING

The informal sector which provides nearly 80% of total Indian employment is cash centric. The sector consists of 21000 unorganized markets, 38.3 million small and medium size enterprises. About 92% of the trade in Fast Moving Consumer Goods (FMCG) is taking place across petty shops (Kiranas) in India³. As the note ban move was sudden and unplanned, it caused considerable inconvenience to the daily wagers and working class. The earlier attempts to demonetize the notes in 1946 and 1978 did not affect the working class since less than 5% of population had access to those high value notes⁴. The recent step to cash ban is a bold step and daring to implement because outcome is uncertain.

Statement Of The Problem

Since independence, corruption, black economy and sponsored terrorist act were a major hurdle for India's economic growth. For instance, India stood 76th rank out of 168 nations in International Corruption Index 2015. Moreover, the Income Tax raid held between April 2014 and Nov 2016 unearthed nearly Rs. 31,277 crore black money and Rs. 2164 crore worth of undisclosed assets⁵. The RBI had detected nearly 6.5 lakh fake notes of higher value in circulation as per its Annual Report 2016⁶. From 2013, 205 out of 6087 districts in India were badly affected by terrorism and such incidents are more frequent at present. This provoked the Indian Army to conduct surgical attacks on enemies. Fake Indian Currency Notes (FICN) Network is funding the terror networks in India. Because of this India lost nearly 707 lives and more than 3200 were injured so far. The recent bout of Demonetisation was a long pending affair as Rome was not built in a day. Finally the govt. announced the cash ban on Nov 8, 2016 anticipating the short term pain for long term gain to the society.

Transient Impact Of Demonetization

Demonetisation has caused a sudden breakdown in Indian commercial eco system. Cash centric sectors were virtually shutdown. The rural population became job loss. Poor and working people have been dislocated and their livelihoods were irreparably damaged. Farmers could not buy inputs, private hospitals refused to treat patients who had only old notes. Some of the working class found difficulty in buying food and forced to adopt a meal per day. Wedding and other

social events were disrupted because the working class did not have access to structural set up to adopt to this shock doctrine economics.

Demonetisation And Employment

The job creation is always a challenge to the Govt. even before demonetization. The cash ban resulted in more job losses in various sectors of the economy. Nearly 2.5 lakh workers in leather industry and 15% to 20% of daily wagers in jewel sector became jobless⁸. Majority of ceramic tiles units were closed in Gujarat. In Surat, more than 20,000 workers in diamond sector lost their job. The Demonetisation results in reverse migration of work force thereby crores of people lost their earnings⁹. According to Sitaram Yecherury, CPI, since 8th No 2016, four lakh jobs were vanished and more than 31.9 million textile workers have not been getting wages. All India Manufacturers Association (AIMA) projected a drop in employment of 60% and loss in revenue of 55% to its member units during post demonetization. Indian infrastructure sector saw a cut of 35% in its employment mainly due to cash crunch¹⁰. The Budget 2017-18 created a positive impact on Indian job market. According to Rituparna Chakraborty, Teamlease, budget directly suggests employment for youth in tourism, footwear, leather, textile and manufacturing industries. Relaxation of tax on corporate from 30% to 25% will increase the employment by 5 to 10%. As investment focus on infrastructure, it also going to boost employment in the sector. The digital payments also encourage job creation in cyber security and allied sector.

Demonetisation And Investments

As per the World Bank Report, Capital formation in India has downward trend since 2011. In addition, Demonetisation has created an uncertainty in the flow of investments. New investments fell by 50% in post demonetization. The investment proposals which were 227 prior to cash ban declined to 177 till 31st December 2016. The value of investment proposals were dropped from Rs. 81.8 thousand crore to Rs. 43.7 thousand crore during the period. The Private Final Consumption Expenditure (PFCE) reduced from 7.5% in 2015-16 to 5.5% in 2016-17¹¹. But the Govt.'s commitment to macroeconomic stability like lowering inflation, reduced bank rate and bank deposit rate, the sharp reduction in current account deficit became strong fundamentals for India to attract more investments. The Govt. of West Bengal received investment proposals worth Rs. 2.35 lakh crore on January 2017¹². The union budget 2017-18 also paved way for a healthy investment atmosphere in Indian economy.

Demonetisation And GDP

The contraction in cash supply slowdown the GDP. The Govt. Of India also lowered its GDP estimate from 7.6% to 7.1% for 2016-17¹³. In addition, the International Monetary Fund (IMF) has also lowered its forecast for Indian GDP from 7.5% to 6.6% for the year 2016-17¹⁴. Dr. Montek Singh Ahluwalia, former Deputy Chairman, Planning Commission also projected India's GDP between 5% to 5.5% for the year 2016-17 mainly due to demonetization. But Amercain Rating Agency 'Fitch' projected India's GDP at 6.9% from earlier 7.4% for the fiscal year 2017¹⁵. The Indian rating agencies ICRA and CARE also down grade the GDP to 6.8% in FY 17. According to Mahesh Vyas, CMIE, India's GDP growth will shift down to 6% per annum for next five years from 2017-18 because of demonetization¹⁶. But budget 2017-18 stated that Demonetisation will bring clear and bigger GDP because effect of cash ban is not expected to spill over to 2017-18. The GDP growth is projected between 6.75% to 7.5% for 2017-18. The capital expenditure is increased by almost 25% in budget. The fiscal deficit is 3.2% in 2017-18 and 3% in 2018-19. The Revenue deficit for 2017-18 is at 1.9%. The FOREX reserve is at \$361 billion in January 2017 which is enough to cover the next 12 months imports bill¹⁷.

Demonetisation And Rupee

The demand and supply of currency will determine its value. Since demonetization, Rupee has depreciated by 1.69% from Rs. 66.63 to 67.75 on 15.12.16. Such declining trend will continue till currency circulation is fully restored. The currency circulation which was 11.8% on November 4, 2016 reduced to 6.5% on 20.01.2017. The US Fed Interest hike from 0.5% to 0.75% resulted in fund outflow i.e., nearly \$1.4 billion Foreign Investors Fund was pulled out of Indian Stock Market from November 7, 2016 to December 12, 2016. In addition, FOREX reserve also dropped from \$367.04 billion to \$359.67 billion during the corresponding period¹⁸. The cash withdrawal limit was lifted for current accounts from February 1, 2017 onwards. The savings bank account holder's cash withdrawal limit likely to do away by February 2017 end. The end of such transitional pain will augment the money circulation in near future which has positive impact on Rupee. The Protectionism policy of Donald Trump, the US Fed Interest policy change finally resulted in strengthening the value of USD. The RBI fixed the reference rate of Rs. at 68.2043 against USD on 27.01.2017¹⁹.

Demonetisation And Real Estate

Indian real estate is cash intensive. In addition, the sector had been witnessing a slowdown for the past three years. Since demonetization, nearly 37% declined in property registration in

Mumbai. The rate of home sales had fallen by 50% and price by 20%. Union budget 2017-18 has focused a good deal in real estate which is beneficial to home buyers, developers and investors. The proposed infrastructure status to affordable housing, including a pledge to build one crore rural homes in next two years become a boost to Indian reality. According to Sunil Rohokale, ASK Group, the infrastructure status to reality opens up a lot of avenues to raise capital domestically from Insurance companies and pension funds. The policies like Smart Cities, Housing for All by 2022, AMRUT, Real Estate (Regulatory and Development) Act, Benami Transaction Act including GST Act will bring more transparency in the sector. But pricing is a major problem to all stakeholders in the Industry.

Digitalization And Demonetisation

In India, the average no of card transaction per inhabitant is mere 6.7 compared to UK (201.7). India is emerging as digital India. Now it is at the cusp of a massive digital revolution. The Govt. had assumed that a significant portion of illegal assets is stored in the form of high value currency. Till 30.12.2016, around Rs. 14.97 trillion banned notes were deposited into banks which equals to 96.5% of total banned notes. It means that only Rs. 54,000 crore notes failed to make it back. The 96.5% deposits include Rs. 80,000 crore of repayment of loans, Rs. 25000 crore deposited in dormant accounts, Rs. 16,000 crore deposited in co-operatives and Rs. 13,000 crore deposited in Regional Rural Banks. Besides, more than Rs.2 lakh deposited in each account over 60 lakh bank accounts during the period²⁰. As identifying black money in the mess takes time, the goal post of cash ban was shifted towards digital economy. Generally, the cash drive economy ultimately resulted in mounting of black money. The digitalization makes services faster, formal and accountable. The mobile wallet transaction per day rose 12 times in post demonitisation. As average value of transactions had fallen from Rs. 750 to Rs. 500, people started to use digital way even for petty expenses. “PayTM” showed three fold rise and “Oxygen” by 160% rise during the post shock therapy. The rural masses have started embracing digital payments through mobile wallets. Specific tax incentives and prizes offered for digital mode of payments to motivate people to follow digital way.

Indian Stock Market - Post Demonetisation

Actually the surgical strike on black money shook the investors' confidence. The BSE SENSEX experienced a bit lower of 6% on the very next day of cash ban. As Warren Buffet rightly said, 'be fearful when others are greedy', the volatility in the stock markets caused uncertainty in

nothing but buying opportunities. BSE SENSEX climbed the best weekly gain in 8 months of 0.63% on 27.01.2017. The Nifty also gained 0.45% during that weekend²¹. According to Porinju veliyath, Equity Intelligence India, Demonetisation drive brought a long term positive impact on Indian formal sector. To compete with informal sector, the formal sector has to mobilize huge investments from the stock market. The Union Budget 2017-18 is continued with tax exemption for long term capital gain from shares, which raised BSE SENSEX by 485.68 points and Nifty by 155.1 points on the day of budget itself²².

Challenges Unleashed By Demonetization

According to CMIE, the total transaction cost of Demonetisation including the GDP losses around Rs. 4.3 trillion²³. But eradication of corruption, black money and terrorism is far most important. In 2012, the Central Board of Direct Taxes (CBDT) opined that Demonetisation may not be a solution to solve black economy. It is so because the black assets are largely held in the form of benami properties, bullion in and out of India. During the cash ban, the tax authorities have conducted 556 surveys, 253 searches and 289 seizures. They seized Rs. 112.29 crore new high denomination currencies and Rs. 18 lakh fake new currencies. Over 75% funds officially recorded as received by Indian political parties between 2004 and 2014 were from unknown sources. Such donations lead to formations of Industrial lobby in our parliament. The unexpected large scale land purchase outside future smart cities in advance of November 8, 2016 may be attributed to the role of industrial lobby²⁴. It is learnt that 58% of GDP is under the control of 1% population which is against the philosophy of prevention of concentration of economic power in few hands. It is aptly mentioned that nearly 4 tons of gold were purchased by the economic offenders in 48 hrs after the announcement of note ban of Nov 8, 2016. The Govt. has to act in time to implement Benami Transaction Act, Real Estate (Regulation and Development) Act, Bank Reforms, Restructuring Informal Sector and speed of ongoing digital payments besides ensure cyber security. The Govt. has to ensure both formal and informal sector should co-exist in country like India where inequality remains high. The 29 state owned banks wrote off Rs. 1.14 lakh crores of bad debts between 2013 and 2015 in which farmers were expected to get the benefits²⁵. Recently the number of farmers' suicide shows an increasing trend. So transparency and accountability must be strongly imposed in all sectors of the economy. The RBI's Corporate Governance Reforms 2015 in Indian public sector banks has to be implemented properly on a continuous basis with needed changes.

Conclusion

The success of Demonetisation depends on the way in which it is being executed. In 1991, Union of Soviet Socialist Republic (USSR) introduced Demonetisation which led to creation of Commonwealth of Independent States (CIS). Such move in North Korea made people homeless while cash ban in Nigeria in 1984 resulted in complete collapse of their economy. It is known that the Govt. machinery was unprepared to meet the challenges of cash crunch when it is implemented. There were nearly 62 amendments and notification during the first 3 weeks of its announcement. Consumer's confidence was fully shaken psychologically which require a comprehensive strategy to boost domestic consumption by improving purchasing power of working class. India is rich but Indians are poor. So a steady but low rate of inflation is always vital to protect the poor Indians who are daily wagers.
